

Ecology & Technology

The Smart thermostat, thanks to new technologies, calculates daily requirements of warm water analyzing the consumptions and plans the water heating to reduce the losses of heat and optimize the availability of warm water.

**Bandini**  
SCALDABAGNI

High efficiency vertical electric water heater

# Smart

## SMART 60-80-100

Double insulation !

**SMART MODE:**  
You can choose between 4 different levels of Comfort

**MANUAL MODE:**  
Water temperature is kept constant. You can set the temperature with the touch-panel.

**VACATION MODE:**  
for long periods of absence from home, select Vacation Mode

- Easy to use
- Memorise of water consumptions
- Calculation of daily requirements based on the consumptions
- Checking of the water heating phases to reduce the losses of heat and optimize the availability of warm water
- Double insulation
